

MOBILE BANKING SERVICE FOR SME CUSTOMERS

State Bank Freedom, our Mobile Banking Service, has been extended to customers of SME segment also. The Service is available over all the four modes, namely

- J2ME Application (GPRS or SMS)
- Wireless Application Protocol (WAP)
- USSD
- SMS

The registration process is the same as is for P segment customers i.e.

Send an SMS MBSREG to 567676 or 9223440000 to get user ID and default MPIN.

Choose the mode of Service.

- If your handset is java enabled with GPRS connectivity, you may download the application using the link received along with user ID and default MPIN. Else, visit the Branch for downloading the application via cable/blue tooth.
- If your handset is non java, but having GPRS connectivity you may use the Service through WAP.
- If your handset is non java and not enabled for GPRS, use the Service over USSD (available over select GSM operators only) or through SMS.
- Change the default MPIN- Receive messages (i) confirming change of MPIN and (ii) completion of Handset validation.

Visit the Branch; submit the application form for registration, clearly indicating whether you would like to exercise transaction rights or Enquiry rights only. Your account will be activated immediately.

The usage is similar to the Service available for P Segment customers
